## Independent Accountants' Review Report

Based on a report originally issued in Korean

The Board of Directors and Shareholders  
KT&G Corporation:

We have reviewed the accompanying statement of financial position of KT&G Corporation (the "Company") as of June 30, 2010, and the related statements of comprehensive income for the three- and six-month periods and changes in equity and cash flows for the six-month periods all of which ended June 30, 2010 and 2009. Management is responsible for the preparation and fair presentation of these financial statements. Our responsibility is to issue a report on these financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Semi-Annual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. These Standards require that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review consists principally of inquiries of company personnel and analytical procedures applied to financial data and, thus, provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our reviews, nothing has come to our attention that causes us to believe that the financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards.

The statement of financial position of the Company as of December 31, 2009, the related statements of comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report were audited by us and our report thereon, dated February 11, 2010, expressed an unqualified opinion. The accompanying statement of financial position of the Company as of December 31, 2009, presented for comparative purposes, is not different from that audited by us in all material respects.

The accompanying financial statements as of and for the three- and six-month period ended June 30, 2010 have been translated into United States dollars solely for the convenience of the reader. We have reviewed the translation and, in our opinion, the financial statements expressed in Korean Won have been translated into dollars on the basis set forth in note 4 to the financial statements.

The following matters may be helpful to the readers in their understanding of the financial statements:

As discussed in note 28 to the financial statements, the Company and the Korean Government are defendants in lawsuits claiming damages of ₩584 million for the effects of smoking. The final outcome of these lawsuits cannot be predicted. Accordingly, no provisions have been made in the accompanying financial statements.

KPMG Samjong Accounting Corp.  
Seoul, Korea  
August 10, 2010

This report is effective as of August 10, 2010, the review report date. Certain subsequent events or circumstances, which may occur between the review report date and the time of reading this report, could have a material impact on the accompanying financial statements and notes thereto. Accordingly, the readers of the review report should understand that there is a possibility that the above review report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

June 30, 2010 and 2009

**1 Organization and Description of Business**

KT&G Corporation (the "Company"), which is engaged in manufacturing and selling tobacco, was established on April 1, 1987 as Korea Monopoly Corporation, a wholly-owned enterprise of the Korean Government, pursuant to the Korea Monopoly Corporation Act, in order to secure financing and to promote and develop, through efficient management, the monopoly business of red ginseng and tobacco. On April 1, 1989, the Company changed its name to Korea Tobacco and Ginseng Corporation pursuant to the Korea Tobacco and Ginseng Corporation Act. Also, pursuant to the Act on Management Reform and Privatization of Public Enterprises, proclaimed on August 28, 1997 and enforced on October 1, 1997, the Company was excluded from the application of the Act for the Management of Government Invested Enterprises. Accordingly, the Company became an entity existing and operating under the Commercial Code of Korea. The Korean Government sold 28,650,000 shares of the Company to the public during 1999 and the Company listed its share on the Korea Exchange (formerly, the Korea Stock Exchange) on October 8, 1999. On December 27, 2002, the Company changed its name again to KT&G Corporation from Korea Tobacco and Ginseng Corporation.

As of June 30, 2010, the Company has four manufacturing plants, including the Shintanjin plant, and 14 local headquarters and 168 branches for the sale of tobacco throughout the country. Also, the Company has the Gimcheon plant for fabrication of leaf tobacco and the Cheonan printing plant for the manufacturing of packaging. The head office of the Company is located in Pyeongchon-dong, Daedeok-gu, Daejeon.

Pursuant to the Korean Government's privatization program and management reorganization plan, on December 28, 1998, the shareholders approved a plan to separate the Company into two companies by setting up a subsidiary for its red ginseng business segment effective January 1, 1999. The separation was accomplished by the Company's contribution of the assets and liabilities in the red ginseng business segment into a wholly-owned subsidiary, Korea Ginseng Corporation.

On October 17, 2002 and October 31, 2001, the Company listed 35,816,658 and 45,400,000 Global Depositary Receipts ("GDR") (each GDR representing the right to receive one-half share of an ordinary share of the Company), respectively, on the Luxembourg Stock Exchange pursuant to the Korean Government's privatization program. Also, on June 25, 2009, the market of the Company's GDR was changed from the BdL market to the Euro MTF in the Luxembourg Stock Exchange.

The ownership of the Company's issued ordinary shares as of June 30, 2010 is held as follows:

<i>Shareholder</i>	<i>Number of shares</i>	<i>Percentage of ownership</i>
Industrial Bank of Korea	9,510,485	6.93%
Employee Share Ownership Association	4,912,294	3.58%
Treasury shares	10,093,697	7.35%
Others	112,776,021	82.14%
	137,292,497	100.00%

**2 Basis of Preparation**

**(a) Statement of Compliance**

The financial statements have been prepared in accordance with Korean International Financial Reporting Standards ("K-IFRS"), as prescribed in the Act on External Audit of Corporations. K-IFRS is effective from the fiscal year beginning on or after January 1, 2011 and the Company early-adopted K-IFRS from 2009.

These financial statements are separate financial statements which are those presented by a parent or an investor in an associate, in which the investments are accounted for on the basis of the direct equity interest rather than on the basis of the reported results and net assets of the investee in accordance with K-IFRS No.1027 *Consolidated and Separate Financial Statements*.

The financial statements have been prepared in accordance with K-IFRS No.1034 *Interim Financial Reporting*.

**(b) Basis of Measurement**

The financial statements have been prepared under the historical cost basis except as described in the accounting policy below on financial instruments, inventories valued at net realizable value and share-based payments.

**(c) Use of Estimates and Judgments**

The preparation of the financial statements in conformity with K-IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about critical judgements in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in the following notes:

- classification of investment property – Note 7.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year is included in the following notes:

- measurement of defined benefit obligations – Note 21
- provisions and contingencies – Note 28.

**3 Significant Accounting Policies**

**(a) Investments in Subsidiaries and Associates in the Separate Financial Statement**

These financial statements are separate financial statements which are those presented by a parent or an investor in an associate in accordance with K-IFRS No.1027, in which the investments are accounted for on the basis of the direct equity interest rather than on the basis of the reported results and net assets of the investees. The Company accounts for investments in subsidiaries and associates at cost. The Company measures an investment in Korea Ginseng Corporation at the deemed cost which is previous GAAP carrying amount at the date of transition in accordance with K-IFRS No.1101 *First-time Adoption of Korean International Financial Reporting Standards*. Dividends on investments in subsidiaries and associates are recognized in profit or loss when the Company's right to receive payment is established.

**(b) Foreign Currencies**

These financial statements are presented in Korean Won, which is the Company's functional currency that is the currency of the primary economic environment in which the Company operates.

Foreign currency transactions are initially recorded using the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. At the end of each reporting period, foreign currency monetary items are translated using the closing rate. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognized in profit or loss in the period in which they arise. When gains or losses on non-monetary items are recognized in other comprehensive income, exchange components of those gains or losses are recognized in other comprehensive income. Conversely, when gains or losses on non-monetary items are recognized in profit or loss, exchange components of those gains or losses are recognized in profit or loss.

**(c) Property, Plant and Equipment**

Property, plant and equipment are measured initially at cost and after initial recognition, are carried at cost less accumulated depreciation and accumulated impairment losses. The cost of property, plant and equipment includes expenditure arising directly from the construction or acquisition of the asset, any costs directly attributable to bringing the asset to the location and condition necessary for them to be capable of operating in the manner intended by management and the initial estimate of the costs of dismantling and removing the item and restoring the site on which they are located.

Subsequent costs are recognized in the carrying amount of property, plant and equipment at cost or, if appropriate, as separate items if it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing are recognized in profit or loss as incurred.

**(c) Property, Plant and Equipment (continued)**

Property, plant and equipment, except for land and other tangible fixed assets, are depreciated on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. The estimated useful lives were as follows:

	Useful lives (years)
Buildings and structures	10 ~ 60
Machinery and vehicles	4 ~ 12
Tools, furniture and fixtures	4

Each part of property, plant and equipment with a cost that is significant in relation to the total cost are depreciated separately.

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. The change is accounted for as a change in an accounting estimate.

**(d) Intangible Assets**

Intangible assets are measured initially at cost and after initial recognition, are carried at cost less accumulated amortization and accumulated impairment losses. Intangible assets consist of industrial property rights, rights to facility usage and other intangible assets. Intangible assets are amortized on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use. The residual value of intangible assets is assumed to be zero. However, as there are no foreseeable limits to the periods over which rights to facility usage and some of industrial property right are expected to be available for use, these intangible assets are regarded as having indefinite useful lives and not amortized.

The estimated useful lives were as follows:

	Useful lives (years)
Industrial property rights	10 ~ 20 or indefinite
Rights to facility usage	indefinite
Other intangible assets	15

The amortization period and the amortization method for intangible assets with a finite useful life are reviewed at each financial year-end. The useful lives of intangible assets that are not being amortized are reviewed each period to determine whether events and circumstances continue to support an indefinite useful life assessment for those assets. If it is appropriate to change, such a change is accounted for as a change in an accounting estimate.

**(e) Investment Property**

Properties held to earn rentals or for capital appreciation are classified as investment properties. Investment properties are measured initially at its cost including transaction costs and after initial recognition, are carried at cost less accumulated depreciation and accumulated impairment losses.

Subsequent costs are recognized in the carrying amount of investment property at cost or, if appropriate, as separate items if it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing are recognized in profit or loss as incurred.

Investment properties, except for land, are depreciated on a straight-line basis over 10 ~ 60 years, the estimated useful lives. Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. The change is accounted for as a change in an accounting estimate.

**(f) Inventories**

Inventories are measured at the lower of cost and net realizable value. The cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories is determined by the weighted-average method for finished goods, by-products, work-in-progress and tobacco leaf in raw materials, by the moving-average method for raw materials and supplies; and by the specific identification method for all other inventories.

When inventories are sold, the carrying amount of those inventories is recognized as an expense in the period in which the related revenue is recognized. The amount of any write-down of inventories to net realizable value and all losses of inventories are recognized as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realizable value, is recognized as a reduction in the amount of inventories and recognized as an expense in the period in which the reversal occurs.

Tobacco leaf inventories which have an operating cycle that exceeds 12 months are classified as current assets, consistent with recognized industry practice. The estimated amounts of inventories in current assets which are not expected to be realized within 12 months are ₩343,549 million and ₩362,594 million, respectively, as of June 30, 2010 and December 31, 2009.

**(g) Non-derivative Financial Assets**

The Company classifies a non-derivative financial asset into the following four categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables or available-for-sale financial assets, relating to recognition and measurement of financial assets. The Company recognizes financial assets in the statement of financial position when the Company becomes a party to the contractual provisions of the financial asset. The Company derecognizes financial assets from the statement of financial position when the contractual rights to the cash flows from the financial asset expire or the Company transfers the contractual rights to receive the cash flows on the financial asset in a transaction in which all the risks and rewards of ownership of the financial asset are substantially transferred. If the Company retains substantially all the risks and rewards of ownership of the transferred financial assets, the Company continues to recognize the transferred financial asset and recognizes financial liabilities for the consideration received.

Non-derivative financial assets comprise investments in equity and debt securities, long-term deposits in MSA Escrow Fund, trade and other receivables and cash and cash equivalents. When non-derivative financial assets are recognized initially, the Company measures it at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset.

*Financial Assets at Fair Value through Profit or Loss*

Financial assets are classified at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Upon initial recognition transaction costs are recognized in profit or loss when incurred. Financial assets at fair value through profit or loss are measured at fair value, and changes therein are recognized in profit or loss.

*Held-to-maturity Investments*

Non-derivative financial assets with fixed or determinable payments and fixed maturity that the Company has the positive intention and ability to hold to maturity are classified as held-to-maturity investments. After initial recognition, held-to-maturity investments are measured at amortized cost using the effective interest method.

*Loans and Receivables*

Loans and receivables are trade receivables, loans and other receivables with fixed or determinable payments that are not quoted in an active market. After initial recognition, loans and receivables are measured at amortized cost using the effective interest method except for short-term receivables of which the effect of discounting is immaterial.

*Available-for-sale Financial Assets*

Available-for-sale financial assets are those non-derivative financial assets that are designated as available for sale or are not classified as financial assets at fair value through profit or loss, held-to-maturity investments or loans and receivables. Subsequent to initial recognition, they are measured at fair value and changes therein are recognized directly in other comprehensive income, except for impairment losses and foreign exchange gains and losses on monetary available-for-sale financial asset. Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost. When the financial asset is derecognized or impairment losses is recognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. Dividends on an available-for-sale equity instrument are recognized in profit or loss when the Company's right to receive payment is established

**(g) Non-derivative Financial Assets (continued)**

*Cash and Cash Equivalents*

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Equity investments are excluded from cash equivalents unless they are, in substance, cash equivalents, for example in the case of preferred shares acquired within a short period of their maturity and with a specified redemption date. Bank overdrafts are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

**(h) Non-derivative Financial Liabilities**

The Company classifies non-derivative financial liabilities into financial liabilities at fair value through profit or loss or other financial liabilities in accordance with the substance of the contractual arrangement and the definitions of financial liabilities. The Company recognizes financial liabilities in the statement of financial position when the Company becomes a party to the contractual provisions of the financial liability and removes financial liabilities from the statement of financial position when the financial liability is extinguished.

Non-derivative financial liabilities comprise borrowings and trade and other payables. When non-derivative financial liabilities are recognized initially, the Company measures it at its fair value minus, in the case of financial liabilities not at fair value through profit or loss, transaction costs that are directly attributable to the issue of the financial liability.

*Financial Liabilities at Fair Value through Profit or Loss*

Financial liabilities are classified at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Upon initial recognition transaction costs are recognized in profit or loss when incurred. Financial liabilities at fair value through profit or loss are measured at fair value, and changes therein are recognized in profit or loss.

*Other Financial Liabilities*

Other financial liabilities are those non-derivative financial liabilities that are not classified as financial liabilities at fair value through profit or loss. After initial recognition, other financial liabilities are measured at amortized cost using the effective interest method except for short-term liabilities of which the effect of discounting is immaterial.

**(i) Derivative Financial Instruments**

Derivatives are recognized initially at fair value. Attributable transaction costs are recognized in profit or loss when incurred.

A hedge of the exposure to changes in fair value of a recognized asset or liability or an unrecognized firm commitment that is attributable to a particular risk is accounted for as a fair value hedge. A hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction is accounted for as a cash flow hedge.

At the inception of the hedge, the Company formally designates the hedging relationship and the Company's risk management objective and strategy for undertaking the hedge and documents identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the Company will assess the hedging instrument's effectiveness. The Company assesses the hedge effectiveness on an ongoing basis throughout the financial reporting periods for which the hedge was designated.

Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for as described below.

*Fair Value Hedges*

The gain or loss from remeasuring the hedging instrument designated as a fair value hedge at fair value and the gain or loss on the hedged item attributable to the hedged risk is recognized in profit or loss.

*Cash Flow Hedges*

The portion of the gain or loss on the hedging instrument designated as a cash value hedge that is determined to be an effective hedge is recognized in other comprehensive income and the ineffective portion of the gain or loss on the hedging instrument is recognized in profit or loss. The associated gains or losses that were recognized in other comprehensive income is reclassified from equity to profit or loss in the same period or periods during which the hedged forecast transaction affects profit or loss. If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset or a non-financial liability, the associated gains and losses that were recognized in other comprehensive income are removed and included in the initial cost or other carrying amount of the asset or liability.

If the hedging instrument expires or is sold, terminated or exercised or the hedge no longer meets the criteria for hedge accounting or the Company revokes the designation, the hedge accounting is discontinued prospectively. The cumulative gain or loss on the hedging instrument that has been recognized in other comprehensive income is reclassified from equity to profit or loss when the forecast transaction occurs. If the transaction is no longer expected to occur, the cumulative gain or loss that had been recognized in other comprehensive income is immediately reclassified from equity to profit or loss.

Changes in the fair value of derivatives that are not designated as hedging instrument or do not meet the criteria for hedge accounting are recognized immediately in profit or loss.

As of June 30, 2010, the Company does not have derivative financial instruments.

**(j) Non-current Assets Held for Sale**

The Company classifies a non-current asset (or disposal group) as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use, and measures it at the lower of its carrying amount and fair value less costs to sell.

A non-current asset which is classified as held for sale or which is part of a disposal group classified as held for sale is not depreciated.

The Company recognizes an impairment loss for write-down of the asset (or disposal group) to fair value less costs to sell and a gain for increase in fair value less costs to sell of an asset, but not in excess of the cumulative impairment loss that has been recognized previously in accordance with K-IFRS No.1036 *Impairment of Assets*.

**(k) Revenue Recognition**

The Company's revenue categories consist of goods sold, services and other income.

Revenue from sale of goods is measured at the fair value of the consideration received or receivable, net of tobacco excise and other taxes, trade discounts and volume rebates. Revenue from the sale of goods is recognized when the Company has transferred to the buyer the significant risks and rewards of ownership of the goods, the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the Company and the costs incurred or to be incurred in respect of the transaction can be measured reliably. Tobacco excise and other taxes deducted from revenue for the six-month periods ended June 30, 2010 and 2009 were ₩1,625,630 million and ₩1,900,508 million, respectively.

Revenue from the building lotting-out construction contracts is recognized upon delivery when the significant risks and rewards of ownership of the goods are transferred to the buyer.

Revenue associated with the transaction involving the rendering of services is recognized by reference to the stage of completion of the transaction at the end of the reporting period when the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the Company, the stage of completion of the transaction at the end of the reporting period can be measured reliably and the costs incurred for the transaction and the costs to complete the transaction can be measured reliably. When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognized only to the extent of the expenses recognized that are recoverable.

Revenue arising from the use by others of the Company assets yielding interest, royalties and dividends is recognized when it is probable that the economic benefits associated with the transaction will flow to the Company and the amount of the revenue can be measured reliably.

In addition, interest is recognized using the effective interest method, royalties are recognized on an accrual basis in accordance with the substance of the relevant agreement and dividends are recognized when the shareholder's right to receive is established.

June 30, 2010 and 2009

**3 Significant Accounting Policies (continued)**

**(l) Impairment of Non-financial Assets**

The Company assesses at the end of each reporting period whether there is any indication that an asset may be impaired except for inventories, deferred tax assets, assets arising from employee benefits and non-current assets (or disposal groups) classified as held for sale. If any such indication exists, the Company estimates the recoverable amount of the asset. Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, irrespective of whether there is any indication that it may be impaired. If there is any indication that an asset may be impaired, recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Company determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

The recoverable amount is measured as the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use. If the recoverable amount of an asset or cash-generating unit is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is recognized in profit or loss.

**(m) Impairment of Financial Assets**

The Company assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired, except a financial asset at fair value through profit or loss. A financial asset or group of financial assets is considered to be impaired if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset and that loss event has an impact on the estimated future cash flows of the financial asset. For specific financial assets such as trade receivables, if the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, it collectively assesses them for impairment. The objective evidence that the group of loans and receivables is impaired includes an increased number of delayed payments and an adverse change in national or local economic conditions that correlate with defaults on the assets in the group.

The amount of the impairment loss on financial assets carried at amortized cost is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced either directly or through use of an allowance account. The amount of the loss is recognized in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date the impairment is reversed. The amount of the reversal is recognized in profit or loss.

The amount of the impairment loss on financial assets carried at cost is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Notes to the Financial Statements (continued)  
(Unaudited)

**3 Significant Accounting Policies (continued)**

**(m) Impairment of Financial Assets (continued)**

When a decline in the fair value of an available-for-sale financial asset has been recognized in other comprehensive income and there is objective evidence that the asset is impaired, the cumulative loss that had been recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment even though the financial asset has not been derecognized. Impairment losses recognized in profit or loss for an investment in an equity instrument classified as available for sale are not reversed through profit or loss. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed, with the amount of the reversal recognized in profit or loss.

**(n) Income Taxes**

Income tax expense comprises current tax expense and deferred tax expense. Current and deferred taxes are recognized as an expense included in profit or loss for the period, except to the extent that the tax arises from a transaction which is recognized in other comprehensive income or directly in equity.

Current tax expense is the amount of income taxes payable (recoverable) in respect of the taxable profit (tax loss) for a period. Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities are recognized for temporary differences which are differences between the carrying amount of an asset or liability in the statement of financial position and its tax base, the carryforward of unused tax losses and unused tax credits. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted by the end of the reporting period.

The Company recognizes a deferred tax liability for all taxable temporary differences associated with investments in subsidiaries and associates, except to the extent that the parent or investor is able to control the timing of the reversal of the temporary difference; and it is probable that the temporary difference will not reverse in the foreseeable future.

The Company recognizes a deferred tax asset for all deductible temporary differences arising from investments in subsidiaries and associates, to the extent that, and only to the extent that it is probable that the temporary difference will reverse in the foreseeable future; and taxable profit will be available against which the temporary difference can be utilized.

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period. The Company reduces the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of these deferred tax assets to be utilized. Such reduction is reversed to the extent that it becomes probable that sufficient taxable profit will be available.

Income tax expense is recognized in each interim period based on the best estimate of the weighted average annual income tax rate expected for the full financial year.

**(o) Dividends**

The dividends declared to holders of equity instruments after the reporting period are not recognized as a liability at the end of the reporting period.

**(p) Equity Capital**

Ordinary shares are classified as equity. Incremental costs directly attributable to the equity transaction are recognized as a deduction from equity, net of any tax effects.

If the Company reacquires its own equity instruments, those instruments ("treasury shares") are presented as a deduction from total equity. The gain or loss on the purchase, sale, issue or cancellation of treasury shares is not recognized in profit or loss but recognized directly in equity.

**(q) Provisions, Contingent Assets and Contingent Liabilities**

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The risks and uncertainties that inevitably surround many events and circumstances are taken into account in reaching the best estimate of a provision. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognized when, and only when, it is virtually certain that reimbursement will be received if the Company settles the obligation. The reimbursement is treated as a separate asset.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

**(r) Employee Benefits**

*Short-term Employee Benefits*

Short-term employee benefits are employee benefits that are due to be settled within 12 months after the end of the period in which the employees render the related service. When an employee has rendered service to the Company during an accounting period, the Company recognizes the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service.

The Company recognizes the expected cost of profit-sharing and bonus payments if the Company has a present legal or constructive obligation to make such payments as a result of past events; and a reliable estimate of the obligation can be made.

*Retirement Benefits: Defined Contribution Plans*

With regard to the defined contribution plan, when an employee has rendered service to the Company during a period, the Company recognizes the contribution payable to a defined contribution plan in exchange for that service as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the end of the reporting period, the Company recognizes that excess as an asset (prepaid expense) to the extent that the prepayment will lead to a reduction in future payments or a cash refund.

*Retirement Benefits: Defined Benefit Plans*

The Company classifies retirement benefits plans other than defined contribution plans as defined benefit plans. The defined benefit liabilities are calculated at the present value of the defined benefit obligations less the fair value of the plan assets at the end of the reporting period.

In determining the present value of its defined benefit obligations and the related current service cost, the Company uses the projected unit credit method.

With regard to actuarial gains and losses which arise from application of actuarial assumptions, the Company recognizes all actuarial gains and losses in other comprehensive income. Actuarial gains and losses recognized in other comprehensive income are recognized immediately in retained earnings and are not reclassified to profit or loss in a subsequent period.

*Termination benefits*

The Company recognizes termination benefits as a liability and an expense when, and only when, the Company is demonstrably committed to terminating the employment of an employee or group of employees before the normal retirement date or providing termination benefits as a result of an offer made in order to encourage voluntary redundancy.

**(s) Share-based Payment Transactions**

For equity-settled share-based payment transactions, the Company measures the goods or services received, and the corresponding increase in equity, directly, at the fair value of the goods or services received, unless that fair value cannot be estimated reliably. If the Company cannot estimate reliably the fair value of the goods or services received, the Company measures their value, and the corresponding increase in equity, indirectly, by reference to the fair value of the equity instruments granted.

For cash-settled share-based payment transactions, the Company measures the goods or services acquired and the liability incurred at the fair value of the liability. Until the liability is settled, the Company remeasures the fair value of the liability at the end of each reporting period and at the date of settlement, with any changes in fair value recognized in profit or loss for the period.

For share-based payment transactions in which the terms of the arrangement provide either the Company or the counterparty with the choice of whether the Company settles the transaction in cash or by issuing equity instruments, the Company accounts for that transaction, or the components of that transaction, as a cash-settled share-based payment transaction if, and to the extent that, the Company has incurred a liability to settle in cash, or as an equity-settled share-based payment transaction if, and to the extent that, no such liability has been incurred.

**(t) Earnings per Share**

The Company presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss for the period attributable to owners of the Company by the weighted-average number of shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss for the period attributable to owners of the Company and the weighted-average number of shares outstanding for the effects of all dilutive potential shares, which comprise employee share options.

**4 Basis of Translating Financial Statements**

The financial statements are expressed in Korean Won and have been translated into U.S. dollars at the rate of ₩1,210.30 to \$1, the basic exchange rate on June 30, 2010, solely for the convenience of the reader. This translation should not be construed as a representation that any or all of the amounts shown could be converted into United States dollars at this or any other rate.

12 Trade and Other Receivables (continued)

There is no significant concentration of credit risk with respect to trade and other receivables since trade and other receivables, excluding export trade receivables, are widely dispersed amongst a number of customers. The Company holds bank guarantees, other guarantees and credit insurance in respect of some of the past due debtor balances.

- (e) Details of trade and other receivables that are measured at amortized cost as of June 30, 2010 and December 31, 2009 were as follows:

<i>In millions of Won</i>	Effective interest rate	June 30 2010		Effective interest rate	December 31 2009

17 Reserves (continued)

(c) Legal Reserve

The Korean Commercial Code requires the Company to appropriate a legal reserve in an amount equal to at least 10% of cash dividends for each accounting period until the reserve equals 50% of stated capital. The legal reserve may be used to reduce a deficit or may be transferred to ordinary shares in connection with a free issue of shares.

(d) Details of voluntary reserve as of June 30, 2010 and December 31, 2009 were as follows:

<i>In millions of Won</i>		June 30 2010	December 31 2009

Unconditional reserve		792,000	589,000
	₩	1,563,732	1,342,378

*Reserve for Business Rationalization*

Until December 10, 2002 under the Special Tax Treatment Control Law, investment tax credits were allowed for certain investments. The Company was, however, required to appropriate from retained earnings, the amount of tax benefits received, and transfer such amount into a reserve for business rationalization.

Effective December 11, 2002, the Company was no longer required to establish a reserve for business rationalization despite tax benefits received for certain investments and, consequently, the existing balance is now regarded as a voluntary reserve.

*Reserve for Business Expansion*

Reserve for business expansion was a legal reserve under the Korea Tobacco and Ginseng Corporation Act, which was abrogated on September 1, 1997, consequently, the existing balance has been regarded as a voluntary reserve since then.

*Other Reserves*

Reserves for research and human resource development and loss on reissuance of treasury shares were appropriated in order to utilize certain tax deduction benefits through the early recognition of future expenditures. These reserves are restored to retained earnings in accordance with the relevant tax laws. Such reserves are taken back into taxable income in the year of restoration. Reserves without specific purposes are restored to retained earnings by a resolution at a general meeting of shareholders.

**27 Risk Management**

**(a) Overview**

The Company has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- currency risk
- interest rate risk
- other market price risk.

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk and the Company's management of capital including quantitative disclosures.

**(b) Risk Management Framework**

The purpose of managing financial risks is to identify the potential risk factors that may affect the Company's financial performance, and minimize, eliminate and avoid it to the extent that is acceptable. One of the principal responsibilities of the treasury department is to manage the financial risks arising from the Company's underlying operations. The treasury department monitors and manages the financial risk arising from the Company's underlying operations in accordance with the risk management policies and procedures authorized by the board of directors. Also, the treasury department provides an internal report analyzing the nature and exposure level on financial risks to Risk Management Committee of the Company. The Risk Management Committee prepares the overall strategy for financial risk management, and evaluates the effectiveness of the financial risk management. In addition, the internal auditor consistently observes the compliance of the risk management policy and procedure, and reviews the risk exposure limit of the Company. The Company applied the same financial risk management strategy that was applied in the previous period.

27 Risk Management (continued)

(c) Management of Financial Risks

*Credit Risk*

The Company has exposure to the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company has transacted with customers with high credit ratings to manage credit risk, and has implemented and operated policies and procedures for credit enhancements of the financial assets. Counterparty credit risk is managed by evaluating its credit rating and limiting the aggregate amount and duration of exposure before sales commence, and the Company has been provided collaterals and guarantees. The credit ratings of all counterparties and the level of collaterals and guarantees are reviewed regularly. Analysis of financial assets past due has been reported quarterly and appropriate measures have been taken to secure the Company's assets.

The carrying amount of financial assets is maximum exposure to credit risk. The maximum exposure to credit risk as of June 30, 2010 and December 31, 2009 is as follows:

<i>In millions of Won</i>		June 30 2010	December 31 2009
Available-for-sale financial assets	₩	271,944	443,800
Long-term deposits in MSA Escrow Fund		134,409	118,121
Trade and other receivables		598,607	612,298
Cash and cash equivalents		540,035	268,954

Export trade receivables to overseas clients, including Alokozay International Limited are ₩247,976 million, ₩229,096 million, and equal to 58.4% and 54.9% of the aggregate trade receivables, respectively, as of June 30, 2010, December 31, 2009. The Company's trade receivables mentioned above were insured against non-payment up to USD36,925 thousand and USD36,200 thousand by export guarantee insurance with the Korea Export Insurance Corporation, respectively, as of June 30, 2010 and December 31, 2009. The Company has no significant concentration of customer credit risk since trade and other receivables, excluding the above export trade receivables, are widely dispersed amongst a large number of customers.

The Company has made deposits on cash, cash equivalents and long-term deposits in NACF and several financial institutions with high credit ratings, thus the credit risks from these financial institutions are very limited.

*Liquidity Risk*

The Company has exposure to the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company's management has established short-term and long-term financial management plan to manage the liquidity risk, and analyzed cash outflows occurred and cash outflows budgeted, so as to match the maturity structure of financial assets and financial liabilities. The Company's management determines the financial liabilities are repayable with the operating cash flows and cash inflows from financial assets. The Company entered into an overdraft agreement with the NACF to manage the temporary liquidity risk.

The above financial liabilities are presented at the nominal value of undiscounted future cash flows as of the earliest period at which the Company can be required to pay.

*Currency Risk*

The Company has exposure to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates arising from the export and import of tobacco. The Company's management has measured the currency risk internally and regularly, and has entered into foreign currency option contract to hedge foreign currency risk in case of need.

The above sensitivity analysis was applied to monetary assets and liabilities denominated in foreign currencies other than the functional currency at the end of the reporting period.

*Interest Rate Risk*

The Company has exposure to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's management has monitored the level of interest rates regularly and has maintained the balance of borrowings at variable rates and fixed rates. As of June 30, 2010, there is no significant effect on cash flows or the fair value of financial liabilities from the interest rate fluctuation, considering the amounts of interest bearing liabilities.

*Other Market Price Risk*

The Company has exposure to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Other market price risk arises from available-for-sale equity instruments held for investments. The Company's management has monitored the mix of debt and equity instruments in its investment portfolio based on market indices. Material investments within the portfolio are managed on an individual basis and all buy and sell decisions are approved by the Company's management.

(d) Management of Capital Risk

The fundamental goal of capital management is the maximization of shareholders' value by means of the stable dividend policy and the retirement of treasury shares. The capital structure of the Company consists of equity and net debt deducting cash and cash equivalents and current financial instruments from borrowings. The Company applied the same capital risk management strategy that was applied in the previous period.

As of June 30, 2010 and December 31, 2009, the Company defines net debt and equity as follows:

<i>In millions of Won</i>	June 30 2010	December 31 2009

*The Fair Value Hierarchy*

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The level of fair value hierarchy is as follows:

- 
- Level I The quoted prices in active markets for identical assets or liabilities
  - Level II The inputs that are observable for the asset or liability, either directly or indirectly
  - Level III The inputs for the asset or liability that are not based on observable market data
- 

The fair value measurements classified by fair value hierarchy as of June 30, 2010 and December 31, 2009 were as follows:

<i>In millions of Won</i>		Level I	Level II	Level III	Total
<b>As of June 30, 2010:</b>
