

# GREEN IMPACT PATHWAY

## Major environmental activities by KT&G's value chain

KT&G implements environmental management throughout value chain ranging from leaf tobacco cultivation to distribution, manufacturing, business operation, and consumer. Based on systematic goals and strategies, we will respond to environmental issues and reinforce business sustainability.

**03 Plants and Offices**

- Saving energy by adopting LED lights to major plants

Progress	Replaced with 10,700 LED lights in six plants
Short-term goal	100% transition into high-efficiency lights inside and outside the plants(2023)

- Improving energy efficiency in internal process of the plants
- Reducing 20% of water consumption at worksites compared with 2020 by 2030
- Achieving 90% waste recycling rate by 2030
