Independent Auditors' Review Report

Based on a report originally issued in Korean

The Board of Directors and Shareholders
KT&G Corporation:

Reviewed Financial Statements
We have reviewed the accompanying consolidated interim financial statements of KT&G Corporation and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as of June 30, 2011, and the related consolidated statements of comprehensive income for the three- and six-month periods and changes in equity and cash flows for the six-month periods all of which ended June 30, 2011 and 2010, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility
Management is responsible for the preparation and fair presentation of these consolidated interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034 *Interim Financial Reporting*, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Review Responsibility
Our responsibility is to issue a report on these consolidated interim financial statements based on our reviews. We conducted our reviews in accordance with Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion
Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial statements referred to above are not prepared, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034 *Interim Financial Reporting*.

The following matters may be helpful to the readers in their understanding of this review report of the consolidated interim financial statements:

As discussed in note 31 to the consolidated interim financial statements, the Group and the Korean government are defendants in lawsuits claiming damages of ₩584 million for the effects of smoking. The final outcome of these lawsuits cannot be predicted.

Other Matters
The consolidated statement of financial position of the Group as of December 31, 2010, the related consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report were audited by us and our report thereon, dated February 22, 2011, expressed an unqualified opinion. The accompanying consolidated statement of financial position of the Group as of December 31, 2010, presented for comparative purposes, is not different from that audited by us in all material respects.

The accompanying consolidated interim financial statements as of and for the three- and six-month period ended June 30, 2011 have been translated into United States dollars solely for the convenience of the reader. We have reviewed the translation and, nothing has come to our attention to suggest that the consolidated interim financial statements expressed in Korean won have not been translated into dollars on the basis set forth in note 4 to the consolidated interim financial statements.

This report is effective as of August 12, 2011, the review report date. Certain subsequent events or circumstances, which may occur between the review report date and the time of reading this report, could have a material impact on the accompanying consolidated interim financial statements and notes thereto. Accordingly, the readers of the review report should understand that there is a possibility that the above review report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

1. Organization and Description of Business

KT&G Corporation (the "Parent Company"), which is engaged in manufacturing and selling tobaccos, was established on April 1, 1987 as Korea Monopoly Corporation, a wholly-owned enterprise of the Korean government, pursuant to the Korea Monopoly Corporation Act, in order to secure financing and to promote and develop, through efficient management, the monopoly business of red ginseng and tobacco. On April 1, 1989, the Parent Company changed its name to Korea Tobacco and Ginseng Corporation pursuant to the Korea Tobacco and Ginseng Corporation Act. Also, pursuant to the Act on Management Reform and Privatization of Public Enterprises, proclaimed on August 28, 1997 and enforced on October 1, 1997, the Parent Company was excluded from the application of the Act for the Management of Government Invested Enterprises. Accordingly, the Parent Company became an entity existing and operating under the Commercial Code of Korea. The Korean government sold 28,650,000 shares of the Parent Company to the public during 1999 and the Parent Company listed its shares on the Korea Exchange (formerly, the Korea Stock Exchange) on October 8, 1999. On December 27, 2002, the Parent Company changed its name again to KT&G Corporation from Korea Tobacco and Ginseng Corporation.

As of June 30, 2011, the Parent Company has four manufacturing plants, including the Shintanjin plant, and 14 local headquarters and 139 branches for the sale of tobacco throughout the country. Also, the Parent Company has the Gimcheon plant for fabrication of leaf tobacco and the Cheonan printing plant for the manufacturing of packaging. The head office of the Parent Company is located in Pyeongchon-dong, Daedeok-gu, Daejeon.

Pursuant to the Korean government's privatization program and management reorganization plan, on December 28, 1998, the shareholders approved a plan to separate the Parent Company into two companies by setting up a subsidiary for its red ginseng business segment effective January 1, 1999. The separation was accomplished by the Parent Company's contribution of the assets and liabilities in the red ginseng business segment into a wholly-owned subsidiary, Korea Ginseng Corporation.

On October 17, 2002 and October 31, 2001, the Parent Company listed 35,816,658 and 45,400,000 Global Depositary Receipts ("GDR") (each GDR representing the right to receive one-half share of an ordinary share of the Parent Company), respectively, on the Luxembourg Stock Exchange pursuant to the Korean government's privatization program. Also, on June 25, 2009, the market of the Parent Company's GDR was changed from the BdL market to the Euro MTF in the Luxembourg Stock Exchange.

The ownership of the Parent Company's issued ordinary shares as of June 30, 2011 is held as follows:

In millions of won,
except number of shares and percentage of ownership

Shareholder	Number of shares	Percentage of ownership	Amount
Industrial Bank of Korea	9,510,485	6.93%	47,552
Employee Share Ownership Association	3,716,594	2.71%	18,583
Treasury shares	11,284,790	8.22%	56,424
Others	112,780,628	82.14%	563,903
Retirement of treasury shares	-	-	268,497
	137,292,497	100.00%	954,959

2. Basis of Preparation

(a) Statement of Compliance

The consolidated financial statements have been prepared in accordance with Korean International Financial Reporting Standards ("K-IFRS"), as prescribed in the Act on External Audit of Corporations. K-IFRS is effective from the fiscal year beginning on or after January 1, 2011 and the Group early-adopted K-IFRS from 2009.

These consolidated financial statements have been prepared in accordance with K-IFRS No.1034 *Interim Financial Reporting*.

(b) Basis of Measurement

The consolidated financial statements have been prepared under the historical cost basis except as described in the accounting policy below on financial instruments and inventories valued at net realizable value.

(c) Use of Estimates and Judgments

The preparation of the consolidated financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about critical judgements in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements is included in the following notes:

- Classification of investment property – note 8
- Deferred revenue – note 24.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year is included in the following notes:

- Measurement of defined benefit obligations – note 23
- Provisions and contingencies – note 31.

3. Significant Accounting Policies

(a) Basis of Consolidation

Subsidiaries
A subsidiary is an entity controlled by the Group, where control is the power to govern the financial and operating policies of the entity so as to obtain benefit from its activities. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing the control. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to its financial statements in preparing the consolidated financial statements.

Profit or loss and each component of other comprehensive income are attributed to owners of the Parent Company and to non-controlling interests. Total comprehensive income is attributed to owners of the Parent Company and to non-controlling interests even if this results in non-controlling interests having a deficit balance.

Associates
An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture. The investment in an associate is initially recognized at cost and the carrying amount is increased or decreased to recognize the Group's share of the profit or loss and changes in equity of the associate after the date of acquisition. If an associate uses accounting policies other than those of the Group for like transactions and events in similar circumstances, appropriate adjustments are made to its financial statements in applying the equity method.

Transactions Eliminated on Consolidation
Intra-group balances and transactions, and any unrealized income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

(b) Foreign Currencies

These consolidated financial statements are presented in Korean won, which is the Parent Company's functional currency that is the currency of the primary economic environment in which the Group operates.

Foreign currency transactions are initially recorded using the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. At the end of each reporting period, foreign currency monetary items are translated using the closing rate. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognized in profit or loss in the period in which they arise. When gains or losses on non-monetary items are recognized in other comprehensive income, exchange components of those gains or losses are recognized in other comprehensive income. Conversely, when gains or losses on non-monetary items are recognized in profit or loss, exchange components of those gains or losses are recognized in profit or loss.

3. Significant Accounting Policies, Continued

(b) Foreign Currencies, Continued

If the functional currency of foreign operations differs from the Group's presentation currency, assets and liabilities for each statement of financial position presented (including comparatives) are translated using the exchange rate at the date of that statement of financial position and income and expenses for each statement of comprehensive income presented (including comparatives) are translated using the exchange rates at the dates of the transactions. All resulting exchange differences are recognized in other comprehensive income.

(c) Property, Plant and Equipment

Property, plant and equipment are initially measured at cost and after initial recognition, are carried at cost less accumulated depreciation and accumulated impairment losses. The cost of property, plant and equipment includes expenditure arising directly from the construction or acquisition of the asset, any costs directly attributable to bringing the asset to the location and condition necessary for them to be capable of operating in the manner intended by management and the initial estimate of the costs of dismantling and removing the item and restoring the site on which they are located. In addition, in the preparation of the opening K-IFRS consolidated statement of financial position on the date of transition to K-IFRS, the Group measures some land at deemed cost which is fair value at the date of transition in accordance with K-IFRS No.1101.

Subsequent costs are recognized in the carrying amount of property, plant and equipment at cost or, if appropriate, as separate items if it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing are recognized in profit or loss as incurred.

Property, plant and equipment, except for land and other tangible fixed assets, are depreciated on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. The estimated useful lives are as follows:

	Useful lives (years)
Buildings and structures	4 ~ 60
Machinery and vehicles	2 ~ 20
Tools, furniture and fixtures	4 ~ 5

Each part of property, plant and equipment with a cost that is significant in relation to the total cost is depreciated separately.

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. The change is accounted for as a change in an accounting estimate.

3. Significant Accounting Policies, Continued

(d) Intangible Assets

Intangible assets are measured initially at cost and after initial recognition, are carried at cost less accumulated amortization and accumulated impairment losses. Intangible assets consist of industrial property rights, rights to facility usage and other intangible asset. Intangible assets are amortized on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use. The residual value of intangible assets is assumed to be zero. However, as there are no foreseeable limits to the periods over which rights to facility usage and some of industrial property right are expected to be available for use, these intangible assets are regarded as having indefinite useful lives and not amortized.

The estimated useful lives were as follows:

	Useful lives (years)
Industrial property rights	10 ~ 20 or indefinite
Rights to facility usage	indefinite
Other intangible assets	4 ~ 15

The amortization period and the amortization method for intangible assets with a finite useful life are reviewed at each financial year-end. The useful lives of intangible assets that are not being amortized are reviewed each period to determine whether events and circumstances continue to support an indefinite useful life assessment for those assets. If it is appropriate to change, such a change is accounted for as a change in an accounting estimate.

(e) Investment Property

Properties held to earn rental or for capital appreciation are classified as investment properties. Investment properties are measured initially at its cost including transaction costs and after initial recognition, are carried at cost less accumulated depreciation and accumulated impairment losses.

Subsequent costs are recognized in the carrying amount of investment property at cost or, if appropriate, as separate items if it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing are recognized in profit or loss as incurred.

Investment properties, except for land, are depreciated on a straight-line basis over 10 ~ 60 years, the estimated useful lives. Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. The change is accounted for as a change in an accounting estimate.

3. Significant Accounting Policies, Continued

(f) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories is determined by the weighted-average method for merchandise, finished goods, by-products, work-in-progress and tobacco leaf in raw materials, by the moving-average method for raw materials and supplies; and by the specific identification method for all other inventories.

When inventories are sold, the carrying amount of those inventories is recognized as an expense in the period in which the related revenue is recognized. The amount of any write-down of inventories to net realizable value and all losses of inventories are recognized as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realizable value, is recognized as a reduction in the amount of inventories and recognized as an expense in the period in which the reversal occurs.

Tobacco leaf inventories which have an operating cycle that exceeds 12 months are classified as current assets, consistent with recognized industry practice. The estimated amounts of inventories in current assets which are not expected to be realized within 12 months are ₩363,223 million and ₩403,082 million as of June 30, 2011 and December 31, 2010, respectively.

(g) Non-derivative Financial Assets

The Group classifies a non-derivative financial asset into the following four categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables or available-for-sale financial assets, relating to recognition and measurement of financial assets. The Group recognizes financial assets in the consolidated statement of financial position when the Group becomes a party to the contractual provisions of the financial asset. The Group derecognizes financial assets from the consolidated statement of financial position when the contractual rights to the cash flows from the financial asset expire or the Group transfers the contractual rights to receive the cash flows on the financial asset in a transaction in which and all the risks and rewards of ownership of the financial asset are substantially transferred. If the Group retains substantially all the risks and rewards of ownership of the transferred financial assets, the Group continues to recognize the transferred financial asset and recognizes financial liabilities for the consideration received.

Non-derivative financial assets comprise investments in equity and debt securities, long-term deposits in MSA Escrow Fund, trade and other receivables and cash and cash equivalents. When non-derivative financial assets are recognized initially, the Group measures it at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset.

3. Significant Accounting Policies, Continued

(g) Non-derivative Financial Assets, Continued

Financial Assets at Fair Value through Profit or Loss
Financial assets are classified at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Upon initial recognition transaction costs are recognized in profit or loss when incurred. Financial assets at fair value through profit or loss are measured at fair value, and changes therein are recognized in profit or loss.

Held-to-maturity Investments
Non-derivative financial assets with fixed or determinable payments and fixed maturity that the Group has the positive intention and ability to hold to maturity are classified as held-to-maturity investments. After initial recognition, held-to-maturity investments are measured at amortized cost using the effective interest method.

Loans and Receivables
Loans and receivables are trade receivables, loans and other receivables with fixed or determinable payments that are not quoted in an active market. After initial recognition, loans and receivables are measured at amortized cost using the effective interest method except for short-term receivables of which the effect of discounting is immaterial.

Available-for-sale Financial Assets
Available-for-sale financial assets are those non-derivative financial assets that are designated as available for sale or are not classified as financial assets at fair value through profit or loss, held-to-maturity investments or loans and receivables. Subsequent to initial recognition, they are measured at fair value and changes therein are recognized directly in other comprehensive income, except for impairment losses and foreign exchange gains and losses on monetary available-for-sale financial assets. Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost. When the financial asset is derecognized or impairment losses is recognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. Dividends on an available-for-sale equity instrument are recognized in profit or loss when the Group's right to receive payment is established.

Cash and Cash Equivalents
Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Equity investments are excluded from cash equivalents unless they are, in substance, cash equivalents, for example in the case of preferred shares acquired within a short period of their maturity and with a specified redemption date. Bank overdrafts are included as a component of cash and cash equivalents for the purpose of the consolidated statement of cash flows.

3. Significant Accounting Policies, Continued

(h) Non-derivative Financial Liabilities

The Group classifies non-derivative financial liabilities into financial liabilities at fair value through profit or loss or other financial liabilities in accordance with the substance of the contractual arrangement and the definitions of financial liabilities. The Group recognizes financial liabilities in the consolidated statement of financial position when the Group becomes a party to the contractual provisions of the financial liability and removes financial liabilities from the consolidated statement of financial position when the financial liability is extinguished.

Non-derivative financial liabilities comprise borrowings and trade and other payables. When non-derivative financial liabilities are recognized initially, the Group measures it at its fair value minus, in the case of financial liabilities not at fair value through profit or loss, transaction costs that are directly attributable to the issue of the financial liability.

Financial Liabilities at Fair Value through Profit or Loss
Financial liabilities are classified at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Upon initial recognition transaction costs are recognized in profit or loss when incurred. Financial liabilities at fair value through profit or loss are measured at fair value, and changes therein are recognized in profit or loss.

Other Financial Liabilities
Other financial liabilities are those non-derivative financial liabilities that are not classified as financial liabilities at fair value through profit or loss. After initial recognition, other financial liabilities are measured at amortized cost using the effective interest method except for short-term liabilities of which the effect of discounting is immaterial.

(i) Non-current Assets Held for Sale

The Group classifies a non-current asset (or disposal group) as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use, and measures it at the lower of its carrying amount and fair value less costs to sell.

A non-current asset which is classified as held for sale or which is part of a disposal group classified as held for sale is not depreciated.

The Group recognizes an impairment loss for write-down of the asset (or disposal group) to fair value less costs to sell and a gain for increase in fair value less costs to sell of an asset, but not in excess of the cumulative impairment loss that has been recognized previously in accordance with K-IFRS No.1036 *Impairment of Assets*.

3. Significant Accounting Policies, Continued

(j) Revenue Recognition

The Group's revenue categories consist of goods sold, services and other income.

Revenue from sale of goods is measured at the fair value of the consideration received or receivable, net of tobacco excise and other taxes, trade discounts and volume rebates. Revenue from the sale of goods is recognized when the Group has transferred to the buyer the significant risks and rewards of ownership of the goods, the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the Group and the costs incurred or to be incurred in respect of the transaction can be measured reliably. Tobacco excise and other taxes deducted from revenue for the six-month periods ended June 30, 2011 and 2010 were ₩1,621,464 million and ₩1,625,630 million, respectively.

Revenue from lotting-out construction contracts includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments, to the extent that it is probable that they will result in revenue and can be measured reliably. As soon as the outcome of a construction contract can be estimated reliably, contract revenue is recognized in profit or loss in proportion to the stage of completion of the contract and the lotting-out rate. The stage of completion is assessed by reference to surveys of work performed.

Revenue associated with the transaction involving the rendering of services is recognized by reference to the stage of completion of the transaction at the end of the reporting period when the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the Group, the stage of completion of the transaction at the end of the reporting period can be measured reliably and the costs incurred for the transaction and the costs to complete the transaction can be measured reliably. When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognized only to the extent of the expenses recognized that are recoverable.

Revenue arising from the use by others of the Group assets yielding interest, royalties and dividends is recognized when it is probable that the economic benefits associated with the transaction will flow to the Group and the amount of the revenue can be measured reliably.

In addition, interest is recognized using the effective interest method, royalties are recognized on an accrual basis in accordance with the substance of the relevant agreement and dividends are recognized when the shareholders' right to receive is established.

(k) Impairment of Non-financial Assets

The Group assesses at the end of each reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset. Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, irrespective of whether there is any indication that it may be impaired. If there is any indication that an asset may be impaired, recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Group determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

The recoverable amount is measured as the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use. If the recoverable amount of an asset or cash-generating unit is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is recognized in profit or loss.

3. Significant Accounting Policies, Continued

(l) Impairment of Financial Assets

The Group assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired, except a financial asset at fair value through profit or loss. A financial asset or group of financial assets is considered to be impaired if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset and that loss event has an impact on the estimated future cash flows of the financial asset. For specific financial assets such as trade receivables, if the Group determines that no objective evidence of impairment exists for and individually assessed financial asset, it collectively assesses them for impairment. The objective evidence that the group of loans and receivables is impaired includes an increased number of delayed payments and an adverse change in national or local economic conditions that correlate with defaults on the assets in the group.

The amount of the impairment loss on financial assets carried at amortized cost is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced either directly or through use of an allowance account. The amount of the loss is recognized in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date the impairment is reversed. The amount of the reversal is recognized in profit or loss.

The amount of the impairment loss on financial assets carried at cost is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

When a decline in the fair value of an available-for-sale financial asset has been recognized in other comprehensive income and there is objective evidence that the asset is impaired, the cumulative loss that had been recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment even though the financial asset has not been derecognized. Impairment losses recognized in profit or loss for an investment in an equity instrument classified as available for sale are not reversed through profit or loss. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed, with the amount of the reversal recognized in profit or loss.

3. Significant Accounting Policies, Continued

(m) Income Taxes

Income tax expense comprises current tax expense and deferred tax expense. Current and deferred taxes are recognized as an expense included in profit or loss for the period, except to the extent that the tax arises from a transaction which is recognized in other comprehensive income or directly in equity.

Current tax expense is the amount of income taxes payable (recoverable) in respect of the taxable profit (tax loss) for a period. Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities are recognized for temporary differences which are differences between the carrying amount of an asset or liability in the consolidated statement of financial position and its tax base, the carryforward of unused tax losses and unused tax credits. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted by the end of the reporting period.

The Group recognizes a deferred tax liability for all taxable temporary differences associated with investments in subsidiaries and associates, except to the extent that the Group is able to control the timing of the reversal of the temporary difference; and it is probable that the temporary difference will not reverse in the foreseeable future.

The Group recognizes a deferred tax asset for all deductible temporary differences arising from investments in subsidiaries and associates, to the extent that, and only to the extent that it is probable that the temporary difference will reverse in the foreseeable future; and taxable profit will be available against which the temporary difference can be utilized.

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period. The Group reduces the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of these deferred tax assets to be utilized. Such reduction is reversed to the extent that it becomes probable that sufficient taxable profit will be available.

Income tax expense is recognized in each interim period based on the best estimate of the weighted average annual income tax rate expected for the full financial year.

(n) Dividends

The dividends declared to holders of equity instruments after the reporting period are not recognized as a liability at the end of the reporting period.

(o) Equity Capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the equity transaction are recognized as a deduction from equity, net of any tax effects.

If the Group reacquires its own equity instruments, those instruments ("treasury shares") are presented as a deduction from total equity. The gain or loss on the purchase, sale, issue or cancellation of treasury shares is not recognized in profit or loss but recognized directly in equity.

3. Significant Accounting Policies, Continued

(p) Provisions, Contingent Assets and Contingent Liabilities

Provisions are recognized when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The risks and uncertainties that inevitably surround many events and circumstances are taken into account in reaching the best estimate of a provision. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognized when, and only when, it is virtually certain that reimbursement will be received if the Group settles the obligation. The reimbursement is treated as a separate asset.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

In addition, with regard to returns, the Group recognizes revenue, net of estimated returns and provides for the estimated liability at the time revenue is recognized. The related estimated cost of returns is added to the cost of sales or selling, general and administrative expenses. At the point of return, differences arising from estimates are recognized as cost of sales or selling, general and administrative expenses.

(q) Employee Benefits

Short-term Employee Benefits
Short-term employee benefits are employee benefits that are due to be settled within 12 months after the end of the period in which the employees render the related service. When an employee has rendered service to the Group during an accounting period, the Group recognizes the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service.

The Group recognizes the expected cost of profit-sharing and bonus payments if the Group has a present legal or constructive obligation to make such payments as a result of past events; and a reliable estimate of the obligation can be made.

Retirement Benefits: Defined Contribution Plans
With regard to the defined contribution plan, when an employee has rendered service to the Group during a period, the Group recognizes the contribution payable to a defined contribution plan in exchange for that service as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the end of the reporting period, the Group recognizes that excess as an asset (prepaid expense) to the extent that the prepayment will lead to a reduction in future payments or a cash refund.

3. Significant Accounting Policies, Continued

(q) Employee Benefits, Continued

Retirement Benefits: Defined Benefit Plans
The Group classifies retirement benefits plans other than defined contribution plans as defined benefit plans. The defined benefit liabilities are calculated at the present value of the defined benefit obligations less the fair value of the plan assets at the end of the reporting period.

In determining the present value of its defined benefit obligations and the related current service cost, the Group uses the projected unit credit method.

With regard to actuarial gains and losses which arise from application of actuarial assumptions, the Group recognizes all actuarial gains and losses in other comprehensive income. Actuarial gains and losses recognized in other comprehensive income are recognized immediately in retained earnings and are not reclassified to profit or loss in a subsequent period.

Termination Benefits
The Group recognizes termination benefits as a liability and an expense when, and only when, the Group is demonstrably committed to terminating the employment of an employee or group of employees before the normal retirement date or providing termination benefits as a result of an offer made in order to encourage voluntary redundancy.

(r) Deferred Revenue

With regard to ginseng sales, the Group uses the customer loyalty program to provide customers with incentives to buy its goods. If a customer buys goods, the Group awards the customer points which can be redeemed in the future for free or discounted goods. The fair value of the consideration received or receivable in respect of the initial sale is allocated between the points and the other components of the sale. The consideration allocated to the points is estimated by considering the fair value of ginseng provided to customers for the redemption of points and expected rate and timing of redemption. The Group recognizes the consideration allocated to the points as revenue when the points are redeemed and the Group fulfils its obligations to supply awards.

(s) Earnings per Share

The Group presents basic and diluted earnings per share (“EPS”) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss for the period attributable to owners of the Parent Company by the weighted-average number of shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss for the period attributable to owners of the Parent Company and the weighted-average number of shares outstanding for the effects of all dilutive potential shares, which comprise employee share options.

3. Significant Accounting Policies, Continued

(t) Operating Segments

A segment is a distinguishable component of the Group that is engaged in providing products or services, which is determined based on the Group's internal report that is regularly reviewed by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The Group has four operating segments - manufacturing and selling tobaccos (the "Tobacco" segment), manufacturing and selling ginseng products (the "Ginseng" segment), sales or rent of real estate (the "Real Estate" segment) and other operations. The Group's geographical segment information is not included in the consolidated financial statements since segment revenues, segment assets and segment liabilities from external customers attributed to an individual foreign country are immaterial. The prices agreed between the Group companies for intra-group transactions are based on normal commercial practices which would apply between independent businesses.

(u) New Standards and Interpretations Not Yet Adopted

The new and amended standards and interpretations that have been issued but are not yet effective as of June 30, 2011 have not been applied in preparing the consolidated financial statements. None of these is expected to have a significant effect on the consolidated financial statement of the Group, except for K-IFRS No. 1109 *Financial Instruments*. The extent of the impact of adopting this standard on the consolidated financial statements has not been determined.

4. Basis of Translating Financial Statements

The consolidated interim financial statements are expressed in Korean won and have been translated into U.S. dollars at the rate of ₩1,078.10 to $1, the basic exchange rate on June 30, 2011, solely for the convenience of the reader. This translation should not be construed as a representation that any or all of the amounts shown could be converted into United States dollars at this or any other rate.

18. Reserves, Continued

(c) Legal Reserve

The Korean Commercial Code requires the Company to appropriate a legal reserve in an amount equal to at least 10% of cash dividends for each accounting period until the reserve equals 50% of stated capital. The legal reserve may be used to reduce a deficit or may be transferred to ordinary shares in connection with a free issue of shares.

(d) Details of voluntary reserve as of June 30, 2011 and December 31, 2010 were as follows:

In millions of won		June 30 2011	December 31 2010

Unconditional reserve		1,336,000	792,000
	₩	2,107,732	1,563,732

Reserve for Business Rationalization
Until December 10, 2002 under the Special Tax Treatment Control Law, investment tax credits were allowed for certain investments. The Parent Company was, however, required to appropriate from retained earnings, the amount of tax benefits received, and transfer such amount into a reserve for business rationalization.

Effective December 11, 2002, the Parent Company was no longer required to establish a reserve for business rationalization despite tax benefits received for certain investments and, consequently, the existing balance is now regarded as a voluntary reserve.

Reserve for Business Expansion
Reserve for business expansion was a legal reserve under the Korea Tobacco and Ginseng Corporation Act, which was abrogated on September 1, 1997, consequently, the existing balance has been regarded as a voluntary reserve since then.

Other Reserves
Reserve for research and human resource development was appropriated in order to utilize certain tax deduction benefits through the early recognition of future expenditures. This reserve is restored to retained earnings in accordance with the relevant tax laws. Such reserve is taken back into taxable income in the year of restoration. Reserves without specific purposes are restored to retained earnings by a resolution at a general meeting of shareholders.

		₩	62,424	66,507

The Group has entered into a customer credit contract with the National Agricultural Cooperative Federation ("NACF") and other financial institutions. The financial institutions pay past-due trade receivables for customers and the Group has provided guarantees to the financial institutions for customers. The amount paid by the financial institutions is recognized as short-term borrowings on the consolidated statement of financial position.

The Group has entered into a discount on the commercial note agreement with Hana Bank and other financial institutions. Trade receivables discounted in respect of which the Group remained contingently liable are recognized as short-term borrowings on the consolidated statement of financial position.

June 30, 2011 and 2010

23. Retirement Benefits Plan

The Group operates both defined benefit and defined contribution plans.

According to these defined benefit plans, the Group pays retirement benefits calculated under the plan's benefit formula at the time employees leave the Group. The defined benefit obligations are calculated annually by independent actuaries using the projected unit credit method.

(a) The components of retirement benefit for the three- and six-month periods ended June 30, 2011 and 2010 were as follows:

30. Risk Management

(a) Overview

The Group has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- currency risk
- interest rate risk
- other market price risk.

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk and the Group's management of financial risk including quantitative disclosures.

(b) Risk Management Framework

The purpose of managing financial risks is to identify the potential risk factors that may affect the Group's financial performance, and minimize, eliminate and avoid it to the extent that is acceptable. One of the principal responsibilities of the treasury department is to manage the financial risks arising from the Group's underlying operations. The treasury department monitors and manages the financial risk arising from the Group's underlying operations in accordance with the risk management policies and procedures authorized by the board of directors. Also, the treasury department provides an internal report analyzing the nature and exposure level on financial risks to the Risk Management Committee of the Group. The Risk Management Committee prepares the overall strategy for financial risk management, and evaluates the effectiveness of the financial risk management strategy. In addition, the internal auditor consistently observes the compliance of the risk management policy and procedures, and reviews the risk exposure limit of the Group. The Group holds derivative financial instruments to hedge its specific financial risks such as currency risk.

Credit Risk
The Group has transacted with customers with high credit ratings to manage credit risk, and has implemented and operated policies and procedures for credit enhancements of the financial assets. Counterparty credit risk is managed by evaluating its credit rating and limiting the aggregate amount and duration of exposure before sales commence, and the Group has been provided collateral and guarantees. The credit ratings of all counterparties and the level of collateral and guarantees are reviewed regularly. Analysis of financial assets past due has been reported quarterly and appropriate measures have been taken to secure the Group's assets.

The carrying amount of financial assets is maximum exposure to credit risk. The maximum exposure to credit risk as of June 30, 2011 and December 31, 2010 is as follows:

In millions of won		June 30 2011	December 31 2010
Available-for-sale financial assets	₩	284,651	315,177
Long-term deposits in MSA Escrow Fund		133,961	132,414
Trade and other receivables		795,624	740,949
Other financial assets		9,399	15,919
Cash and cash equivalents		847,414	981,314

(c) Management of Financial Risks

Export trade receivables to overseas clients, including Alokozay International Limited are ₩272,292 million and ₩235,636 million, and equal to 44.4% and 43.9% of the aggregate trade receivables, respectively, as of June 30, 2011 and December 31, 2010. The Group's trade receivables mentioned above were insured against non-payment up to USD 39,800 thousand and USD 38,525 thousand by export guarantee insurance with the Korea Export Insurance Corporation, respectively, as of June 30, 2011 and December 31, 2010. The Group has no significant concentration of customer credit risk since trade and other receivables, excluding the above export trade receivables, are widely dispersed amongst a number of customers.

The Group has made deposits on cash, cash equivalents and long-term deposits in NACF and several financial institutions with high credit ratings, thus the credit risks from these financial institutions are very limited.

Liquidity Risk
The Group has exposure to the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Group's management has established short-term and long-term financial management plans to manage the liquidity risk, and analyzed cash outflows occurred and cash outflows budgeted, so as to match the maturity structure of financial assets and financial liabilities. The Group's management determines whether or not the financial liabilities are repayable with the operating cash flows and cash inflows from financial assets. The Group entered into an overdraft agreement with the NACF to manage the temporary liquidity risk.

The maturity analysis with a residual contractual maturity of financial liabilities as of June 30, 2011 and December 31, 2010 is as follows:

				Residual contractual maturity			
In millions of won		Carrying amount	Contractual cash flow	Within 3 months	Between 3 months and 1 year	Between 1 and 5 years	Beyond 5 years
As of June 30, 2011:							
Derivative financial liabilities	₩	-	-	-	-	-	-
Non-derivative financial liabilities		289,848	291,556	129,942	130,402	29,021	2,191
	₩	289,848	291,556	129,942	130,402	29,021	2,191
As of December 31, 2010:

(c) Management of Financial Risks, Continued

Currency Risk
The Group has exposure to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates arising from the export and import of tobacco. The Group's management has measured the currency risk internally and regularly, and has entered into foreign currency option contracts to hedge foreign currency risk in case of need.

The carrying amounts of monetary assets and liabilities denominated in a currency other than the functional currency as of June 30, 2011 and December 31, 2010 were as follows:

				June 30 2011			December 31 2010
In millions of won		USD	EUR	Other currency	USD	EUR	Other currency
Assets:							
Cash and cash equivalents	₩	34,051	36	648	11,461	1,340	477

	₩	37,385	18,389	236	11,276	18,774	231

As of June 30, 2011 and December 31, 2010, the effects of a 10% strengthening or weakening of functional currency against foreign currencies other than functional currency on profit before tax were as follows:

			June 30 2011		December 31 2010
In millions of won		10% strengthening	10% weakening	10% strengthening	10% weakening
USD	₩	50,557	(50,557)	41,783	(41,783)
EUR		(478)	478	(756)	756
Other currency		275	(275)	123	(123)
	₩	50,354	(50,354)	41,150	(41,150)

The above sensitivity analysis was applied to monetary assets and liabilities denominated in foreign currencies other than the functional currency at the end of the reporting period.

Interest Rate Risk
The Group has exposure to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's management has monitored the level of interest rates regularly and has maintained the balance of borrowings at variable rates and fixed rates. As of June 30, 2011 and December 31, 2010, the amount of borrowings issued at variable rates is ₩20,291 million and ₩24,045 million, respectively. There is no significant effect on cash flows or the fair value of financial liabilities from the interest rate fluctuation.

June 30, 2011 and 2010

(c) Management of Financial Risks, Continued

Other Market Price Risk
The Group has exposure to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Other market price risk arises from available-for-sale equity instruments held for investments. The Group's management has monitored the mix of debt and equity instruments in its investment portfolio based on market indices. Material investments within the portfolio are managed on an individual basis and all buy and sell decisions are approved by the Group's management.

As of June 30, 2011 and December 31, 2010, the effects of a 5% fluctuation of the price index of stocks on other comprehensive income were as follows:

		June 30 2011		December 31 2010	
In millions of won		5% increase	5% decrease	5% increase	5% decrease
Other comprehensive income before tax	₩	9,466	(9,466)	13,338	(13,338)

	₩	7,383	(7,383)	10,404	(10,404)

(d) Management of Capital Risk

The fundamental goal of capital management is the maximization of shareholders' value by means of the stable dividend policy and the retirement of treasury shares. The capital structure of the Group consists of equity and net debt deducting cash and cash equivalents and current financial instruments from borrowings. The Group applied the same financial risk management strategy that was applied in the previous period.

As of June 30, 2011 and December 31, 2010, the Group defines net debt and equity attributable to owners of the Parent as follows:

In millions of won		June 30 2011	December 31 2010
Net debt:			
Debt (borrowings)	₩	64,215	68,552

The Fair Value Hierarchy
The Group classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The level of fair value hierarchy is as follows:

- Level Ⅰ The quoted prices in active markets for identical assets or liabilities
- Level Ⅱ The inputs that are observable for the asset or liability, either directly or indirectly
- Level Ⅲ The inputs for the asset or liability that are not based on observable market data

The fair value measurements classified by fair value hierarchy as of June 30, 2011 and December 31, 2010 were as follows:
